ADMINISTRATION

EDWARD R. McCOWEN
County Superintendent
of Schools

B.S. Degree, Ohio University;
Master's Degree, Northwestern
University; has attended Otterbein
College and Harvard University.

Mr. McCowen said in a statement to us:
"The rural schools in Scioto County expect a
continued growth in enrollment during the years
to come.

We shall steadfastly continue to meet the
ever increasing demands of our youth. It is re-
alized by all the difficult and trying times our
seniors will be faced with as they leave these
halls of learning.

The United States of America will be
stronger by these seniors taking their place in
our great democratic society.

"We shall continue to upgrade all curricu-
lums and school facilities for the welfare of
each student, with a stronger society always our
goal."

The Board of Education makes the policies by which Clay High School is run. Seated, left to right, are Mrs. Miller, clerk of the Board of Education; Mr. Bandy, executive head of Clay Local School District; and Board members, Glenn Moritz, president; Chester Chapman; Charles Vanderpool; Robert Allen; and Ron Horsley.

MR. CARL D. BANDY, EXECUTIVE HEAD

In the classroom, on the athletic fields, on the city streets, and at every turn in our ordinary work-a-day world we are confronted with intangibles. We have to choose between right and wrong; between courage and timidity; between love and hate. We don't always choose the right action or make the proper decision. But great moral principles are nurtured by right actions. And the great educative force toward moral principle is the knowledge that it is "what you do under your own steam that counts." The essence of good education is the effort that each individual makes to assume responsibility for his own behavior and his own progress.

MR. ROBERT ESTEPP, PRINCIPAL

As the 1965 school year ends, I wish to thank the faculty, school personnel, and the student body for their fine cooperation and support. You are to be congratulated for a most successful school year.

To the 1965 graduating class, the world of high school and its joys will be met by the seriousness of living in an age of atomic power and space exploration. On the shoulders of you young people will be placed the consequence of that power and success. I hope that the goals which you of this generation seek will be inspired by a higher power than that which a scientist could provide.

As you, the youth, moves, so shall the progress of our nation. Good luck from all of us!

Chapter 1 THE BEGINNINGS IN THE UNITED STATES

The roots of American government reach deep into the past. The system of government did not suddenly spring into being as at the wave of some political magician's wand. Nor was it pulled out of thin air by the

The Colonial Period

Our English, Dutch, Norwegian, French, Spanish, and other settlers in North America had to become the United States. But it was the English who came in the largest numbers. And it was the English who came to control the thirteen colonies that stretched for 1,300 miles along the Atlantic coast.

These early pioneers who shared the wilderness and fought off the Indians had to work out their own way of life in the New World. But they came here in search of greater freedom and they brought with them the political ideas of the old world.

Founding Fathers in Philadelphia in the summer of 1787. Before it was developed through long centuries of experience. Tradition, thought, and deed. We still have some of the roots of that beginning.
